

CHECK VALVE

Type Europa

Product informations

Unidirectional valve designed to allow the flow of water to flow in one direction only, equipped with a shutter and return spring to stop the reflux of liquids inside the pipe or more generally in the system; the mechanism managed by the valve allows to prevent and avoid any contamination or dispersion of liquids which in some cases could prove harmful.

Product features

- when the water pressure is absent (or insufficient) the valve remains closed
- used in hydraulic and aqueduct contexts
- it prevents the system from emptying in the event of a pump failure

Technical Features

OPERATING PRESSURE	16 BAR
OPERATING TEMPERATURE	0°C ÷ 90°C
