ALIGNING CLAMP

Product for welding electrical sleeves

Product informations

Aligning clamp with 4 internal jaws (which can be positioned according to needs) with metal reductions, essential to ensure perfect linearity and to keep the welded items in position until completely cooled; this instrument is equipped with a special central joint which allows a rotation from 0° to 90° and the coupling of the third axle (*optional SKU 21636*).

Accessories

- Third axle TA 125 model which allows the simultaneous alignment of 3 pipes and the consequent welding of the same
