MINI TECNO-BLOCK

Ground base

Product informations

Recycling of discarded tyres is very important for the environment, as up to 95% of the rubber they are made of can be recovered by processing them, allowing the material to be used again by giving it a new life!

The process of processing discarded tyres involves 3 steps

1. Metal removal
2. Tyre Destruction
3. Further grinding to rubber powder, the main ingredient in **MINI TECNO-BLOCK**

The **MINI TECNO-BLOCK** ground base is designed to provide a stable and secure base for air conditioners, heat pumps, dehumidifiers, etc.

Product features

- made of vulcanised anti-UV rubber
- complete with anti-corrosion aluminium profile (groove size depending on model)
- are supplied with standard stainless steel fastening screws and spirit level for correct positioning
