MODULAR BASE

TECNO-BLOCK model

Product informations

Recycling of discarded tyres is very important for the environment, as up to 95% of the rubber they are made of can be recovered by processing them, allowing the material to be used again by giving it a new life!

The process of processing discarded tyres involves 3 steps

1. Metal removal
2. Tyre Destruction
3. Further grinding to rubber powder, the main ingredient in **TECNO-BLOCK**

The **TECNO-BLOCK** modular base is designed to provide a stable and secure base for air conditioners, heat pumps, dehumidifiers, etc...

Product features

- predicts movement, vibration and noise during operation of the unit
- recycled rubber makes this product water and weather resistant, increasing its durability
- specific for VRV/VRF/AC systems, pipes in general and ducted ducts
