WELDING MACHINE ELEKTRA 315

Multi-purpose welding machine for electrofusion fittings

Product informations

ELEKTRA 315, the multi-purpose welding machine for the fusion of PE, PP and PP-R electrofusion fittings at low voltage for transporting gas, water and other pressurised fluids; it has a universal connector and does not require adapter plugs.

Product features

- equipped with laser scanner for reading barcodes and manual scraper
- memory records up to 500 welds

Available accessories

- USB stick to download reports in PDF or BIN format
- DB9M-USB adapter

Technical Features

WORKING RANGE*	20 ÷ 315 MM; 1/2" IPS ÷ 10" DIPS
MATERIAL	PE, PP, PP-R
POWER SUPPLY	• 110 V SINGLE-PHASE 50/60 HZ • 230 V SINGLE-PHASE 50/60 HZ

Welding Machine ELEKTRA 315

MAXIMUM ABSORPTION**	2600 W
MAX WELDING POWER	100 A
WELDING POWER	60 A
INTERNAL MEMORY	500 CYCLES
DEGREE OF PROTECTION	IP54 (PROTECTED AGAINST SPLASHING WATER FROM ANY DIRECTION AND PROTECTED AGAINST DUST, SUCH THAT IT CANNOT INTERFERE WITH THE OPERATION OF THE DEVICE)
SELECTABLE LANGUAGES	21
RECOMMENDED GENERATOR FOR FULL WORKING RANGE	5,5 ÷ 6 KVA
TRANSPORT CASE DIMENSIONS	405 X 285 X 340 MM
WELDING MACHINE DIMENSIONS	263 X 240 X 300 MM
WEIGHT	16 KG
UNIVERSAL CONNECTOR	Ø 4 - 4,7 MM

****The working range may vary depending on the brand of the fitting, please check with the manufacturer of the fitting for the required power and welding time.***

*****Power at 60%.***
